

Dear Max,

We have finished our second season of flies, mosquitos, no-seeums, green-heads and other biting insects at Atlantic, NC.

Thanks to you and Coastal Screening, WE DID NOT HAVE A SINGLE BITE inside the screened porches.

I cannot tell you how nice it is to be able to sit on the porch and enjoy the view without having to slap mosquitos. Or, to have friends over for dinner on the porch and be able to eat without smelling like "Deet". Or, to read the newspaper without having to swat flies with it.

We have not had a hurricane so I cannot comment on the upper limits of the screening but we did have winds of about 47 MPH and there was no stretch at all. Also, from three feet on the porch, it is hard to tell there is any screen. From inside the house, we cannot see the screeing.

Visitors are amazed that the screened area is so wide with no vertical supports. One local resident, who has lived in Atlantic all his life and did not believe your claims when I explained the project to him, now visits us, whenever we come to Atlantic, just to sit on the porch.

One thing we have discovered (you did not tell us this), we have yet to have to remove any salt spray from the screeing. For whatever reason, rain seems to wash the spray away. The view through the screening is as clear today as when it was installed.

Sorry I missed you at the home show.

Thanks again for a great product at a fair price,

Joe Mavretic
